## **DETAILED ACTION**

### ***Information Disclosure Statement***

The Information Disclosure Statement filed 05 January 2005 has been made of record.

### ***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 43-47 and 52 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 43 recites the limitation "the measured signal level" in the first method step. There is insufficient antecedent basis for this limitation in the claim.

Claims 44-47 each recite the limitation "the at least one measurement". There is insufficient antecedent basis for this limitation in the claim. It is suggested that the following method step of claim 43 is amended to "measuring, by a measurement unit *at least one measurement of* a signal level transmit on a second feed back coupling path from the transmitter unit via a receiver path" or similar.

Claim 52 recites the limitation "the measurement point" which was introduced in claim 49, not claim 51. There is insufficient antecedent basis for this limitation in the claim.

Art Unit: 2618

Claim 43 is rejected under 35 U.S.C. 112, second paragraph, as being incomplete for omitting essential elements, such omission amounting to a gap between the elements. See MPEP § 2172.01. The omitted elements are a measurement unit which is better introduced before the first method step of setting a reference signal. Note claim 63 introduces "a receive unit having a measurement unit" in the preamble.

### ***Claim Objections***

Claim 55 is objected to under 37 CFR 1.75(c) as being in improper form because a multiple dependent claim should refer to other claims in the alternative only. See MPEP § 608.01(n). Furthermore, claim 55 indicates multiple dependency to cancelled claims. Accordingly, claim 55 has not been treated on the merits.

Claim 56 is objected to under 37 CFR 1.75(c) as being in improper form because a multiple dependent claim cannot depend from any other multiple dependent claim. See MPEP § 608.01(n). Accordingly, claim 56 has not been treated on the merits.

### ***Allowable Subject Matter***

Claims 48-51, 53, 54 and 57-62 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claim 63 is allowed. The prior art made of record teach an apparatus for gain calibration for a transceiver unit and a receiver unit having a measurement unit but do not teach a signal level measurement unit measuring a measurement reference value associated with a reference signal level when sent via a first feed back coupling path and measuring a signal level transmit on a second feed back coupling path from the transmitter unit via a receiver path, wherein the signal level measurement unit measures a gain adjusted feedback signal level of the second feedback coupling path and a calibrating function for calibrating a gain step of the transceiver according to the relative effect of the gain step on the feedback signal.

### ***Conclusion***

Reference the attached PTO-892 document for the prior art made of record and not relied upon but considered pertinent to applicant's disclosure.
